

PROs Global Opportunities Fund

Factsheet 31/10/2021

Investment Objective and Strategy

The investment objective of the PROs Global Opportunities Fund is to achieve a stable, risk-adjusted return through investments in predominantly non-traditional funds (so-called Alternative Investment Funds and Hedge Funds) with various alternative investment strategies. These are domestic and foreign funds with different legal structures. By carefully selecting and allocating the portfolio to different external fund managers and investment styles, the aim is to control risk and achieve stable returns over the long term, which do not have to correlate with the performance of conventional investment instruments such as equities and bonds. In compiling the fund portfolio, special attention is paid to the volatility and consistency of the returns achieved in the past. The focus is not on maximizing the return, but on an optimal risk/reward ratio. This is an attempt to achieve steady growth. As a rule, no market assessments or forecasts are made for individual markets, but rather successful portfolio managers are selected who have usually achieved a positive result in the various market situations and phase.

The PROs Global Opportunities Fund is suitable for professional investors with the investment objective of capital growth and a long-term investment horizon of at least five years, who have advanced knowledge and/or experience with financial products and who can accept high financial losses up to the point of total loss in order to achieve their investment objective.
